

What Can the Virginia Deaf-Blind Project Do For You?

At the Virginia Project for Children and Young Adults with Deaf-Blindness, we are committed to supporting families, early intervention providers, and service providers as they work to improve outcomes for infants and toddlers who experience both vision and hearing loss. Our project is federally funded through the U.S. Department of Education's Office of Special Education Programs (OSEP) and therefore our training is offered at no cost to families and educators.

What We Offer

- 1. Family support from the Project's Family Engagement Specialist.**
- 2. Customized on-site coaching and consultation on deaf-blind specific strategies including communication and engagement strategies.**
- 3. Access to Network of Parents of Children with Deaf-Blindness in Virginia.**
- 4. Free Lending Library of books, videos and other resources.**
- 5. Online training modules that focus on a variety of topics that impact a child with deaf-blindness.**
