Procedural Safeguards protect the rights and safeguards of families enrolled in Virginia’s early intervention system. It is critical that families understand the early intervention process as well as the rights and safeguards associated with each step throughout this process. This flow chart is designed to be a reference document. It is not intended to replace information in the Infant & Toddler Connection of Virginia’s Practice Manual as not all procedural safeguard forms are required for every family or required at the step in the process where they are listed. It is important that at each step in the early intervention process, Service Coordinators and Service Providers thoroughly read the Practice Manual for detailed information about the child and family rights and safeguards.
