

# INSTANT REPLAY

Some of the insurance terms and acronyms used throughout this webinar may be new or may require a review of the play:

- **National Provider Identifier (NPI)**-nationally recognized provider number used for billing
- **Center for Affordable Quality Healthcare (CAQH)**-national medical provider database used by insurance companies for credentialing
- **Health Maintenance Organization (HMO)**-a company that arranges for managed care for health insurance
- **International Classification of Diseases (ICD)**-world recognized coding system for diagnosis that is required by private insurance and Medicaid for billing
- **Current Procedural Terminology (CPT)**-codes developed by the American Medical Association that are used for treatment procedures
- **Diagnostic and Statistical Manual of Mental Disorders (DSM)**-a coding system used for mental health disorders; rarely used with children birth-age three
